SUMMARY

I am a junior Full-Stack Developer working to improve my skills in .NET Core and React. I've gained experience in developing web applications and RESTful APIs through hands-on projects. I value clean and maintainable code and enjoy working in team environments. Through bootcamps and personal projects, I've been practicing both frontend and backend development. I am a native Turkish speaker, confident in English, and conversational in German.

EDUCATION

Patika+ Full-Stack Web Development Bootcamp
(Graduation Year: 2025)

- Completed an 8-month intensive full-stack development program
- Focused on modern web technologies: React, .NET Core, RESTful APIs, and Docker
- Built multiple full-stack projects following clean architecture and best practices

Atatürk University, Erzurum, Turkey
(Expected Graduation Year: 2025)
- Studied core programming concepts, algorithms, and software development principles
- Gained hands-on experience with C#, databases, and problem-solving

PROJECTS

Personal Portfolio Website
Technologies: React, Material UI, HTML, CSS, JavaScript
- Built and deployed a modern personal portfolio to showcase projects, skills, and background.
- Designed a clean and responsive UI using Material UI and Tailwind CSS.
- Actively being developed to enhance functionality and user experience.
GitHub Live Site

Book Donation Landing Page
Technologies: React, Material UI, HTML, CSS, JavaScript
- Developed a landing page for a non-profit book donation initiative.
- Includes sections like "Who We Are", "Contact", and a submission form to connect with users
- Actively maintained and improved to better serve its audience and purpose.
GitHub Live Site

Tech Stack
